DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 2/29/08 has been entered.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-11 and 33-38 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 5,095,915 Engelson.

Engelson discloses the same invention being a medical device comprising an elongated wire core member 38 having a distal end having a tapered and constant radius portions [3:60-4:2], a polymer jacket (44) free of a coil having a textured surface comprising a helical groove spaced 3 cm from the distal tip [1:67-2:2] and a coating disposed over the polymer jacket [3:60-4:2].

In regards to claims 3, 8, and 34 the examiner is interpreting the grooves of Dobak to have rounded edges because the cross-section is cylindrical. Therefore the grooves when viewed from the end have curved edges.

Response to Arguments

Applicant's arguments with respect to claims 1-11 and 33-38 have been considered but are moot in view of the new ground(s) of rejection.
